RETURN RECEIPT REQUESTED

Mr. James K. Dow
Facilities Manager
Litton Advanced Circuitry Division
P.O. Box 2847, Commercial Station
Springfield, Missouri 65803

Dear Mr. Dow:

It has recently come to the attention of this office that the Litton Advanced Circuitry Division, located in Springfield, Missouri, has not attained compliance with the requirements of 40 CFR Part 265, Subpart F, concerning groundwater monitoring.

As you are aware, no later than November 19, 1981, the owner or operator of a surface impoundment, which is used to manage hazardous waste, must have implemented a groundwater monitoring program capable of determining the facility's impact on the quality of groundwater in the uppermost aquifer underlying the facility. Based on our information, this facility has not yet implemented a groundwater monitoring system for the eight-million gallon lagoon which contains hazardous waste.

Pursuant to Section 3007 of the Resource Conservation and Recovery Act (RCRA), you are requested to answer the following questions concerning this matter:

1. Why has this facility not yet implemented a groundwater monitoring system, as required by 40 CFR Part 265, Subpart F for the lagoon?
2. When will this facility install and implement such a system?

Please submit the answers to these questions to Mr. David Doyle, Air and Waste Compliance Branch, U.S. EPA, 324 East 11th Street, Kansas City, Missouri 64106, within 15 days of receipt of this letter.
